

Case Study

TUI UK, part of the TUI Group and one of the world's leading travel companies, has over 600 retail stores throughout the UK.

The challenge

We were approached by TUI as they were looking for a cloud based system to help them manage their retail store surveys and inspections with ease, ensuring compliance for auditing purposes.

The answer

Klipboard was deployed quickly and efficiently to TUI team members and adoption to the mobile app was seamless due to the intuitive user experience.

Klipboard allows TUI to efficiently schedule and manage the completion of surveys and inspections across their retail estate.

The ability to have real time visibility for those at Head Office ensures that compliance is met whilst also giving further data analysis and insight.
